

HOW TO INSTALL ACTION

Here are simple instructions to install a .atn (Photoshop action) file into Adobe Photoshop:

- 1. Open Photoshop:** Launch Adobe Photoshop on your computer.
- 2. Go to Actions Panel:** If the Actions panel is not already visible, go to **Window** in the menu bar and select **Actions** from the dropdown menu. This will open the Actions panel.
- 3. Load the Action:**
 - In the Actions panel, click on the menu icon at the top right corner (it looks like four horizontal lines).
 - Select **Load Actions...** from the dropdown menu.
 - Navigate to where you've saved your .atn file, select it, and click **Load**.
- 4. Using Your Action:** Once loaded, your new action will appear in the Actions panel. To use it, simply select the action you want to run and click the **Play** button at the bottom of the panel.

That's it! Your new Photoshop action is now ready to use.
